SUSTAINABILITY

We are committed to serving our clients in a way that is economically, environmentally and ethically responsible. The focus of our action lies in the following areas:

WE REDUCE, REUSE AND RECYCLE

We avoid buying things we don't need and when we do need things we buy the most efficient products. We make sensible consumption choices, buy used materials and make the very most of everything we own. We reduce waste and the consumption of resources (materials, fuel and energy) and ensure unavoidable waste is recycled or reused, where possible, or disposed of responsibly.

WE THINK GLOBAL, ACT LOCAL

We do our utmost to ensure the supply chain of products and services we use and provide is sustainable. We reduce the impact of our activities on the local and general environment as much as we can. We shorten our commutes and when we have to travel we weigh up the sustainability benefits of different modes of transport. We use local businesses and support local organisations, especially those with good sustainability practices. We donate a portion of our time and profits to charity every year.

WE CONTINUALLY STRIVE TO IMPROVE OUR ENVIRONMENTAL PERFORMANCE

We always look to improve energy efficiency and reduce the amount of waste we generate. We support thoughtful innovation in manufacturing and production. We maintain a healthy and safe work environment for our people and foster a sense of responsibility for the environment amongst our teams. We ensure compliance with relevant legislation and regulations.
